

SUPRIYA NAGESH

Senior Salesforce Administrator | Apex & Flow Automation

PA, USA · (484) 636-8330 · supriyajnagesh88@gmail.com
[linkedin.com/in/supriya-nagesh](https://www.linkedin.com/in/supriya-nagesh) · [Trailhead Profile](#) · Portfolio: supriyajnagesh.com

SUMMARY

Senior Salesforce Administrator with 7+ years on the platform and 4 Salesforce certifications, including Advanced Administrator and Platform Developer I. Hands-on across Sales Cloud, Service Cloud, and Experience Cloud — Flow and Apex automation, third-party integrations (DocuSign, AssureSign, Litify Inbox, Docrio, Twilio), and Gearset CI/CD. In consulting delivery, owned up to 5 concurrent client orgs, including stabilising an inherited, undocumented org with near-zero post-delivery defects. Now an independent consultant building fully documented production-pattern projects — including a live Agentforce agent deployed on Experience Cloud.

SALESFORCE CERTIFICATIONS

Advanced Administrator · Administrator · Platform Developer I · Platform App Builder

SKILLS

Platform & Automation: Salesforce Flow (Record-Triggered, Screen, Scheduled), Sales Cloud, Service Cloud (Entitlements & Milestones), Experience Cloud, Lightning App Builder, Validation Rules, Security & MFA, Profiles & Permission Sets

Development: Apex (Triggers, Batch, Invocable, REST), SOQL / SOSL, Lightning Web Components, Aura, Visualforce, JavaScript, HTML, CSS

Integration & DevOps: REST APIs, Named & External Credentials, DocuSign, AssureSign, Litify Inbox, Docrio, Twilio, Stripe, Gearset CI/CD, Change Sets, Release Management

Data & Delivery: Data Loader, Data Migration & Cleanup, UAT Support, Root Cause Analysis, Solution Design, Technical Documentation, Agile / Jira

Currently Building: Agentforce (live agent deployed on Experience Cloud; Agentforce Specialist certification in progress)

PROFESSIONAL EXPERIENCE

Independent Salesforce Consultant — PA (Remote)

Nov 2023 – Present

Freelance — production-pattern builds, technical writing, and mentoring

- Designed and built a **full-stack Experience Cloud customer portal** — LWC, Apex REST, Stripe payment webhooks, Service Cloud case handling, and a custom data model — from a self-authored BRD; live and fully documented at supriyajnagesh.com.
- Built and deployed a **live Agentforce agent** on Experience Cloud — guest-accessible, grounded in org data, with designed guardrails and a documented hallucination root-cause fix; Agentforce Specialist certification in progress.
- Built an **SLA Command Centre** on Service Cloud Entitlements and Milestones — pre-breach warning automation, escalation rules, and a real-time case-health dashboard, verified against 14 documented test cases.
- Built **Twilio SMS and DocuSign integrations from scratch** — Named Credentials, custom metadata, Apex callouts, and Flow-only patterns — and published technical deep-dives documenting every failure mode and fix.
- Mentor aspiring Salesforce administrators through structured sessions on Flow, Apex, and admin fundamentals.

BRIO Solutions — Conshohocken, PA

June 2021 – Oct 2023

Senior Salesforce Administrator / Developer — multi-client consulting

- Owned Salesforce administration and development across **up to 5 concurrent client orgs** — automation builds, integrations, configuration, and production support — delivering in agile cycles without missed deadlines in any engagement.
- Inherited an undocumented, mid-transition org with half-built requirements; took full ownership and delivered the SSD Wizard implementation with **near-zero post-delivery defects**, then established documentation and handoff standards adopted by the team.
- Implemented and supported **DocuSign, AssureSign, Litify Inbox, and Docrio integrations** for legal-tech clients — resolving production incidents (envelope failures, recipient mapping, record association) and documenting recurring error patterns to cut resolution time.
- Built reusable **Invocable Apex REST integrations** callable from Flow — no hardcoded IDs, production-safe by design — to pull and categorise external data into Salesforce records.
- Improved **Gearset CI/CD pipelines** and ran production release cycles end-to-end: deployment validation, conflict resolution, post-deployment smoke testing, plus rollbacks and hotfixes under deadline pressure; authored deployment checklists now used as team standard.
- Drove **MFA rollout and security hardening** across multiple orgs — profile reviews, permission set audits, and remediation of over-permissioned profiles to enforce least-privilege access.
- Built an object-agnostic **custom inline-editing solution (Apex / Visualforce)** deployed org-wide, improving data-entry efficiency and earning direct client praise for usability.
- Supported pre-go-live UAT defect resolution under tight deadlines, including fixing an Apex-generated duplicate-task issue affecting production data integrity; mentored junior admins and developers on Flow, Apex, and admin fundamentals.

Villanova University — University Information Technologies (UNIT) — PA Oct 2019 – May 2021

Salesforce Administrator / Developer

- Implemented and managed a new Salesforce platform for tracking university research events — custom objects, triggers, formula fields, automation, and custom views.
- Maintained org security and usability through profile and role management; provided CRM support to online programs across the university.
- Built reports and dashboards delivering accurate research-event insights to stakeholders; customised Lightning pages for usability.

Checksum Infosoft Pvt Ltd — India

June 2017 – June 2019

Salesforce Administrator / Developer

- Developed Apex classes, triggers, and Visualforce pages to improve code performance and deliver business enhancements; deployed via sandbox-tested release process.
- Configured custom objects, validation rules, workflow and auto-response rules, page layouts, and org-wide security (roles, profiles, sharing).
- Led large-volume data migration from legacy systems into Salesforce using Data Loader.

iNetFrame Technologies — India

June 2016 – June 2017

Salesforce Administrator

- Implemented record-based sharing using OWDs, role hierarchies, sharing rules, and manual sharing; enforced data quality with record types and dependent picklists.
- Delivered enhancements including custom objects, workflows, email alerts, templates, and UI changes.

Earlier Experience

2010 – 2016

- Project Engineer at Wipro (The Hartford) and Bharat Electronics Limited, India — QA and mainframe development (COBOL/JCL), including leading a six-month Consumer Pricing Index sub-project; customer-facing support roles in PA after relocating to the US.

EDUCATION

M.S. Software Engineering — Villanova University, PA (GPA 3.7/4.0)

B.S. (Honors) Computer Science Engineering — India
